If your camera has a RAW (RAW image files use more data than ordinary JPG and TIFF files) setting, you can't just import your images into Photoshop without converting the files to a different format. (If your camera has different RAW formats, refer to Chapter 8.) Adobe makes Photoshop one of the most advanced, and pricey, software packages in the world. It can be a very useful tool for advanced users, but if it's too much of a burden to purchase, it's probably not right for your computer needs. Check out some of the applications we list in Appendix A for suitable alternatives to Photoshop. We have many tutorials for using Photoshop, including the following: • Beginning with Photoshop: A Primer for Digital Photographers (www.creativepros.com) • Telling Secrets of Photoshop (www.creativepros.com) • Beginner's Photoshop (www.photoshop.com/tutorial/beginners) • Professional Photoshop Elements (www.photoshop.com/tutorial/photoshop-elements) • PhotoShop Elements 5 for Photographers (www.adobe.com/software/photoshop/main.html) In the following sections, we help you begin the process of setting up your computer to use Photoshop. Installing Photoshop After you download and install Photoshop, you'll need to activate it by following the steps described in Figure 1-1. **Figure 1-1:** The Photoshop Download Center includes all of the tools you need to install Photoshop and set it up for use on your computer. Photoshop should start automatically after a simple computer system check and when you click the Photoshop.exe file. However, if Photoshop doesn't start, you can start it manually by clicking the Photoshop icon in your Start menu. You can also run Photoshop through the Start menu instead. Here's a quick rundown of the Photoshop options you can access through the Start menu: Edit: Runs the Photoshop Editor. If you're familiar with other image-editing software, this is probably the option you want to launch. You can use it just as with any other program. Help: Launches the Photoshop Help Center, shown in Figure 1-2. The Help Center contains many useful tutorials for using Photoshop. Options: Provides the standard Options and Preferences dialog box, shown in Figure 1-3. You can change many settings in this

Effect of gossypol on the expression of glycolipids in rat preimplantation embryos. The role of glycolipids in the implantation and decidualization process is still unclear. Two glycolipids -Gal alpha 1----3Gal beta 1----4Glc-Cer and Glc alpha 1----3Gal beta 1----4Glc-Cer - were detected in rat embryos of the preimplantation and implantation phases of development. These glycolipids were found only in the spermatozoa of the males. In this study, we have examined the possible role of gossypol (a polyphenolic compound found in cottonseed) on the accumulation of glycolipids in rat preimplantation embryos. The results of this study revealed that gossypol significantly decreased the accumulation of glycolipids in rat preimplantation embryos of the blastocyst, morula, and early- and mid-gestation stages at a concentration of 100 micrograms/ml (1 mg gossypol/100 ml water). The survival rate of implantation was decreased by gossypol at higher doses, i.e. 500 and 1000 micrograms/ml (5 mg gossypol/100 ml water), but the effect was not significant. This experimental study suggests that the amount of glycolipids in rat preimplantation embryos is reduced in the presence of gossypol. These effects could be important in the spermatozoa of infertile men with high levels of gossypol in their seminal plasma. Activation of protein kinase C (PKC) by a synthetic peptide corresponding to residues 115-137 of the beta 1 chain of human luteinizing hormone (hLH) in ovine granulosa cells. The present study examines the ability of peptide mimicking a region at the amino terminus of the beta 1 chain of human luteinizing hormone (hLH) to activate protein kinase C (PKC) in ovine granulosa cells and further examines whether the mechanism of activation of PKC by hLH beta 1 differs from that of insulin. The synthetic peptide [K-(C)-Glu-Lys-Arg-Arg-Met-Gly-Ser-Arg-Ser-Met-Ser-Arg-Asp-Glu-Asn-Glu-Pro-Asp

Written by Mike Schmidt VIPAccess.com — Shares of Intel Corp. have dipped 0.6% since Monday, according to data provided by S&P Global Market Intelligence. The firm is keeping a Buy rating on the stock with a \$53.00 price target. Based in Santa Clara, California, the company designs semiconductors, systems and software that “enable transformative experiences,” according to its website. Intel has a market cap of \$139.06 billion. More from VIPAccess.com S&P Lowers Intel Rating To ‘Neutral’: Report How Intel Pushes Consumerization of the Enterprise Intel makes semiconductor chips used in computer processors Intel vs AMD: Wall Street Boutique vs Rivals Processor Innovation Is at the Heart of the Battle Between Intel and AMD The company also designs computer memory chips, and licenses its processor designs to third parties. Its dominant position in the market is often viewed as a threat to semiconductor equipment maker and server powerhouse Advanced Micro Devices (AMD). AMD’s global revenue in Q1 2017 declined 11.1%, while Intel’s reached \$30.52 billion. Over the same period, AMD’s comparable-store sales rose 3.8%, while Intel’s grew an estimated 10.7%. Insurance company Aspen Insurance SA, an Egyptian company operating in the Middle East, has announced its plans to establish a new strategic venture capital fund and raise between \$500 million to \$1 billion from insurance industry players to invest in high-growth companies in the region. Launched recently in April and headquartered in Dubai, Aspen has over 40 years of experience advising large and mid-sized enterprises on capital and operational matters. The fund has been registered and approved to operate in the UAE, Bahrain and Qatar; will be run by the United Arab Emirates-based MMC Corp. “We are pleased to announce the creation of our first strategic fund,” said Nabil Mansour, Aspen CEO. “With the expertise, capital and expertise of the insurance companies, we will be able to assist a large number of entrepreneurs and companies who are unable to access the capital markets due to an over-dependence on non-financial sector sources of capital. “Many of these companies have a good business model, in some cases they are considered ‘unicorns’ in
